Amendments to the Claims

Claims 1 through 22 (cancelled)

23. (Original) An apparatus for controlling access to a bus, comprising:

a peer coupling to communicate state information;

a control and status register; and

a sequencer to transition the state of the apparatus.

24. (Original) The apparatus as claimed in claim 23, further comprising:

a register interface coupled with an arbiter.

25. (Original) The apparatus as claimed in claim 24, wherein the register interface includes an arbiter state.
